NELAP Accredited Laboratory — Cert. No. TX-11842 | ISO/IEC 17025:2017

CERTIFICATE OF ANALYSIS — WASTE CHARACTERIZATION

REPORT NO. MAL-2026-04217	DATE REPORTED August 07, 2026
CLIENT Prairiehawk Resources LLC	PROJECT / SITE Blackrun Federal 14-2H Pad, Reeves County, TX
SAMPLE ID PH-BR14-TB01	SAMPLE MATRIX Tank Bottom Sludge (Solid/Semi-Solid)
DATE COLLECTED July 29, 2026, 10:15 CDT	DATE RECEIVED July 30, 2026, 08:40 CDT
COLLECTED BY J. Alvarado (Prairiehawk EHS)	CHAIN OF CUSTODY NO. COC-77291

1. Case Narrative

One (1) solid/semi-solid sample was submitted for waste characterization to support disposal profiling of tank bottom residue generated during vessel cleanout at the referenced well pad. Analyses were performed in accordance with EPA SW-846 methods as indicated. Toxicity Characteristic Leaching Procedure (TCLP, Method 1311) extraction was performed for RCRA metals and volatile organics. All laboratory quality control samples (method blanks, laboratory control samples, matrix spikes) met acceptance criteria unless otherwise noted in Section 4. Results relate only to the sample as received.

2. Physical & Bulk Characteristics

Parameter	Result	Method	Reporting Limit	Flag
pH (aqueous phase)	6.4 SU	SW-846 9045D	—	Pass
Flash Point	> 200 °F	ASTM D93	—	Pass
Total Petroleum Hydrocarbons (TPH)	18,400 mg/kg	SW-846 8015D	10 mg/kg	—
% Moisture	22.1 %	SM 2540 G	—	—
% Total Solids	77.9 %	SM 2540 G	—	—
Ignitability	Negative (not ignitable)	SW-846 1030	—	Pass
Reactivity (Cyanide)	< 0.25 mg/kg	SW-846 9014	0.25 mg/kg	Pass
Reactivity (Sulfide)	< 1.0 mg/kg	SW-846 9034	1.0 mg/kg	Pass

3. TCLP Metals (SW-846 Method 1311 / 6010D)

Analyte	Result (mg/L)	RCRA Limit (mg/L)	Reporting Limit	Flag
Arsenic	0.041	5.0	0.010 mg/L	Pass
Barium	3.82	100.0	0.10 mg/L	Pass
Cadmium	< 0.005	1.0	0.005 mg/L	Pass
Chromium (Total)	0.088	5.0	0.010 mg/L	Pass
Lead	0.612	5.0	0.010 mg/L	Pass
Mercury	< 0.0002	0.2	0.0002 mg/L	Pass
Selenium	0.019	1.0	0.010 mg/L	Pass
Silver	< 0.005	5.0	0.005 mg/L	Pass

4. Volatile Organics — BTEX (SW-846 Method 8260D)

Analyte	Result (mg/kg)	Reporting Limit	Flag
Benzene	3.9	0.05 mg/kg	Elevated*
Toluene	22.6	0.05 mg/kg	—
Ethylbenzene	8.1	0.05 mg/kg	—
Total Xylenes	41.3	0.05 mg/kg	—

*Benzene reported above the site's internal screening level of 2.0 mg/kg; this parameter is not a federal RCRA characteristic threshold for this waste code and does not by itself render the waste hazardous. Recommend disposal facility review under applicable state land disposal restrictions (LDR).

5. Quality Control Summary

QC Sample	Analyte Group	Recovery / RPD	Acceptance Range	Flag
Method Blank	TCLP Metals	All non-detect	< RL	Pass
Laboratory Control Sample	TCLP Metals	94–106% rec.	80–120%	Pass
Matrix Spike / Matrix Spike Duplicate	BTEX	91% rec. / 4.2% RPD	70–130% / ≤ 20%	Pass
Surrogate Recovery	VOCs (8260D)	98%	70–130%	Pass

6. Waste Classification Summary

Based on the analytical results above, the submitted sample does not exhibit the RCRA hazardous waste characteristics of ignitability (D001), corrosivity (D002), reactivity (D003), or toxicity (D004–D043) at the concentrations tested. This determination pertains solely to the sample as analyzed and does not constitute a regulatory classification by Meridian Analytical Laboratories, Inc. Final waste determination and manifest classification remain the responsibility of the generator.

7. Laboratory Certification

I certify that this report has been reviewed and approved for release, and that the test results relate only to the sample(s) tested, analyzed in accordance with the referenced methods and the laboratory's NELAP-accredited quality system.

Dr. L. Whitfield, Laboratory Director
