NELAP Accredited — Cert. No. SC-30871 | ISO/IEC 17025:2017

CERTIFICATE OF ANALYSIS — SPENT SOLVENT WASTE STREAM

REPORT NO. AICL-26-11567	DATE REPORTED May 14, 2026
CLIENT Palmetto Precision Metal Finishing	PROJECT / SITE Greenville Plant — Degreasing Line 2
SAMPLE ID PPMF-DG2-DRUM014	SAMPLE MATRIX Spent Halogenated Solvent (Liquid)
DATE COLLECTED May 06, 2026, 09:00 EDT	DATE RECEIVED May 07, 2026, 14:15 EDT
COLLECTED BY D. Marsh (Plant EHS Coordinator)	CHAIN OF CUSTODY NO. COC-64420

1. Case Narrative

One (1) liquid sample was collected from a 55-gallon accumulation drum of spent degreasing solvent to support F-listed hazardous waste determination and manifest classification under 40 CFR 261.31. Generator process knowledge indicates the solvent is used for vapor degreasing of machined aluminum parts.

2. Solvent Composition (GC/MS, Method 8260D)

Analyte	Result (% w/w)	Reporting Limit	Flag
Trichloroethylene	78.4 %	0.1 %	Detected
1,1,1-Trichloroethane	6.2 %	0.1 %	Detected
Tetrachloroethylene	1.8 %	0.1 %	Detected
Water / Non-Volatile Residue	13.6 %	—	—

3. Physical Characteristics

Parameter	Result	Method	Flag
Flash Point	None (non-ignitable)	ASTM D93	—
Specific Gravity	1.46	ASTM D891	—
pH	Not applicable (non-aqueous)	—	—

4. RCRA Listed Waste Determination

Based on the presence of trichloroethylene and 1,1,1-trichloroethane as active ingredients (used for degreasing, not as an impurity), this waste stream meets the listing description for F001 (spent halogenated solvents used in degreasing). The waste is classified as a RCRA-listed hazardous waste and must be managed accordingly, including manifesting under EPA Waste Code F001.

5. Laboratory Notes

This classification is based on generator-supplied process description combined with analytical confirmation and does not independently verify solvent end-use. Generator should retain supporting process documentation for RCRA recordkeeping.

I certify that this report has been reviewed and approved for release, and that results relate only to the sample(s) tested in accordance with referenced EPA methods and the laboratory's accredited quality system.

P. Kowalski, Technical Director
